### WEEK 3:

## Connect my career choices to education/training programs

---

During Week 3, adult learners will use both a national and state program search tool to find institutions that offer their program of choice as well as calculate their return of investment (ROI) on their program at Colorado public institutions.

**Learning Objective:** Participants will browse institutions that offer programs in which they are interested and calculate the return of investment (ROI) on programs offered at Colorado public institutions.

**MCJ Tools:** CoTrainingProviders, ROI Tool, Princetonreview.com

**CAM Activity:** Using Princeton Review and CoTrainingProviders search utilities, participants will look up, by program name or career cluster/pathway, available programs offered at institutions in Colorado and nationwide. In addition, return on investment for programs offered by Colorado public institutions may be viewed on an interactive graph.

### Tips for Success:

- Recognize that translating career education expectations into program titles that will achieve those career ends is an inexact science. In addition to the tools listed above, the Careers In Colorado tool on MCJ will assist with this process for the key industries on that tool.
- Encourage the individuals that you work with to log into their My Colorado Journey accounts to complete their activities to ensure that their work is being saved.
